

PROFESSIONAL SUMMARY

Student of AI and ML having a solid background in Artificial Intelligence, Machine Learning, Deep Learning, Data Analytics, Data Science, Feature Engineering, Natural Language Processing, Generative AI Development, and Model Fine-tuning.

EDUCATION

- Kolhapur Institute Of Technology** Kolhapur, INDIA
Computer Science and Engineering (Artificial Intelligence And Machine Learning); GPA: 7.40/10.00 2022 - 2026
- Shri Anandrao Abitkar Junior College** Gargoti, India
Pre-University Education in Science ; Percentage: 71.17% 2020 - 2022

EXPERIENCE

- Airport Authority of India, Kolhapur** Kolhapur, India
AI/ML Intern | Python, OpenCV, Artificial Intelligence, Machine Learning, Computer Vision July 2024 - August 2024
 - Baggage Detection System:** Designed and deployed a real-time AI Unattended Baggage Detection System using OpenCV and machine learning, monitoring 15+ CCTV feeds and cutting manual surveillance workload by 70%.
 - Model Training:** Trained computer vision models on 500+ hours of surveillance footage, achieving 90.6% detection accuracy and reducing false alarms by 40%.
 - System Integration:** Proposed integration recommendations projected to cut security response times by 30%; recognized by senior airport officials.
- ORELSE Pvt Ltd** [City], India
AI & Full-Stack Developer | Python, FastAPI, Next.js, TypeScript, PostgreSQL, MongoDB, n8n June 2026 - Present
 - BuyerPortal (AI Agri-Trade Platform):** Built a full-stack B2B trade platform (Next.js 15, FastAPI, SQLAlchemy, PostgreSQL) with an AI matching engine using Claude and Gemini APIs to match crop specifications to buyer demand, plus a 0-100 trust-scoring model for counterparties.
 - Multi-Tenant SaaS Control Plane:** Architected a tenant-isolated enterprise control plane with FastAPI, Temporal.io workflows, Docker, PostgreSQL, and Redis, including a reusable Python tenant SDK for JWT validation and event-driven provisioning.
 - AI Lead Finder Agent:** Automated lead generation with n8n, Apollo.io, and MongoDB Atlas, replacing manual prospect research.

PROJECTS & HACKATHONS

- ProHomeCare:** Scalable on-demand home-services platform with real-time notifications and online payments; Redis caching cut DB load by 45%.
- VR Campus Navigation:** Immersive VR campus tour with LoD4 3D models, robot-guided tours, and gamified quests; used by 150+ prospective students.
- FreightPilot:** Built a logistics platform that generates dynamic multimodal freight quotes and professional proposals using Gemini 2.0, with automated client follow-ups.
- E-Governance Management System | Quantbit Technologies Hackathon 2025: 2nd Place.** Built a web platform connecting citizens with municipal officers to report and resolve civic issues, with role-based access and a real-time status-tracking dashboard. Designed a scalable multi-city architecture with automated issue categorization, priority assignment, and notifications.

TECHNICAL SKILLS

- Languages:** Python, SQL, JavaScript, TypeScript
- AI / ML:** Machine Learning, Deep Learning, Computer Vision, Generative AI, LLMs, Prompt Engineering, RAG, OpenAI, Gemini, Claude
- Databases & Data Science:** PostgreSQL, MongoDB, Model Training and Evaluation, Data Analytics
- Backend:** FastAPI, Flask, Node.js, Express, REST APIs, JWT, RBAC
- Frontend:** React, Next.js, Tailwind CSS
- Tools:** Git, Docker, Azure DevOps, AWS EC2, n8n
